How to select the correct CITI module for you

*Faculty Researchers*

After registering for CITI you will be asked a series of questions to identify the modules you are to complete.

For Faculty Researchers in response to *Questions #1* click either the “Biomedical” or “Social & Behavioral” radio button depending on your discipline.

While the RCR modules identified in Questions #5 are optional – you are strongly encouraged to take either the RCR for Social & Behavioral Sciences or Art & Humanities depending on your discipline.
