Message from the Dean, Dr. Denise Ohler

It’s been a busy fall semester in the College of Science & Health Professions! As you take a few minutes to digest the outstanding accomplishments of your students and colleagues found in the CSHP Newsletter Fall 2019 Edition, I would like to ask you to consider the holistic nature of STEM education, and how you can merge science and creativity to inspire collaborative thinkers.

A survey conducted by Mays among students in a general biology course was designed to investigate what science students seek from their education. While most of us think that students are looking for a good job, the survey results suggested divergent motivation. The survey found that:

- Engagement and empathy: Students were asked to rate how much they agreed that “in my science course, I often feel that the materials we’re studying are dry.” 41.9% agreed or strongly agreed, while 39.1% agreed or strongly agreed that “the current state of college science education lacks empathy.”

- Stories and purpose: Students rated how much they agreed that “in class, having a clear sense of purpose helps me learn.” 99.1% agreed or strongly agreed, while 72.9% agreed or strongly agreed that “using storytelling to teach science would help me learn better.”

- Arts and beauty: Students rated how much they agreed that “I wish my science professors intentionally highlighted the beauty within science.” 76.7% either agreed or strongly agreed, while 56.4% agreed or strongly agreed that “science classes should incorporate arts into the curriculum.”

- Logic and ethics: Students rated how much they agreed that “science classes should incorporate logic and critical reasoning skill into the curriculum.” 90.6% either agreed or strongly agreed, while 84.6% either agreed or strongly agreed that “science classes should incorporate ethical reasoning skills into the curriculum.”

Connectedness and meaning are important to applying technical skills to real world problems. Isn’t that what we aspire to for ourselves and our students? Mays noted that “I ask students how the topic affects their daily lives, their peers’ lives, and their community…I used a lesson on osmosis to challenge students to think about where water comes from and what water scarcity is. We discussed the current and predicted water crisis around the world and tied the conversation to learning about the technology of reverse osmosis.” These are some thoughts for your consideration as you prepare for your spring 2020 semester.

Yes, the year 2020 is upon us! Your contributions to the enigmas of our increasingly complex world are large and impressive. Best wishes for satisfaction and continued success!

Sincerely,

Denise L. Ohler
Dean

CSHP Student Interview:

Silenia Guerrero-Vasquez

When will you graduate from Edinboro University, and what is your degree?

I will be graduating Edinboro University of Pennsylvania in the Spring of 2020 with a simultaneous dual degree in Social Work and Criminal Justice with minors in psychology and sociology. Additionally, with an associates in Human Services - Social Service.

What are your future plans?

My future plans can change any day but so far, I believe I want to get my master’s in social work policy and work for a few years. After having some experience under my belt, I would like to return to school and attend law school. My end goal in life is to become a congress women and advocate for people’s rights.

Why did you choose Edinboro?

I decided to attend Edinboro University because it was far away from home and I believed that distance would help me become more independent and to find the type of leader I wanted to be. Additionally, I fell in love with the social work department due to the opportunity of the advance master program and how I connected with the professors and faculty when I came to visit the campus.

How has Edinboro helped you to achieve your goals so far?

Edinboro University has helped me to achieve my goals by allowing the opportunity to connect with alumni that I have been able to network with and also gained knowledge by connecting with them.

Who/what inspired you to pursue this field of study?

To be honest, I saw many terrible things in the past twenty-one years of my life and all I know is that I wanted to change my environment and help others. What inspired me to pursue social work and criminal justice was my environment and hearing of stories of my loved ones.

What clubs or extracurricular activities have you been involved in during your time at Edinboro?

My freshman year, I was selected to become the President of the Latino Student Organization and was president for three years. I have seen the way this minority organization has grown and has educated Edinboro University’s students and faculty about their culture. Additionally, I am now the Vice-President of the Phi Alpha Honor Society for Social Workers and a part of Zeta Tau Alpha. Another extracurricular activity I am part of is being a Resident Assistant for the past three years and building a community with my residents. Lastly, I have been a part of Take a Stand Against Sexual Assault, International Student Affiliation, Social Work Club, National Society of Leadership and Success and ATHENA Connections College Leadership Initiative Program.

(Continued)
CSHP Student Interview (continued):

Please share your thoughts on receiving the ATHENA award. Also, how do you feel that this award will shape your future?

I never thought I would represent my university in this special way, as it the first time an Edinboro University student has won. I felt honored and humbled to even be considered as a nominee for this award but to have won this, changed me as a leader. After winning the ATHENA Young Professional Award, I felt that it shaped my future by giving me more motivation to continue working on making my dreams become reality.

Any recommendations for students who are also hoping to work in your field of study?

To always remember the reason why you decided to study social work. It’s definitely not for the money so find your passion in social work. Never be scared to talk to upper classmates and staff, try to be outspoken and network with your peers.

What is your fondest memory of your time at Edinboro University so far?

My fondest memory here at Edinboro University was being a part of the Strategic Planning Committee and advocating on the behalf of the students here at Edinboro University. Being a part of debates and conversations about the future of your school was one of the best experiences I had here in the past three years.

Congratulations to Silenia Guerrero-Vasquez for being the very first student from Edinboro University to be selected for the ATHENA Erie Young Professional Award!

“Silenia exemplifies the core principles of the ATHENA leadership model by actively engaging in organizations and experiences that speak to her values and passions. Silenia was nominated to represent Edinboro University because she has focus, drive, compassion, and a strong work ethic—she is a striver,” said Monica Clem, Executive Director of Career Development and Experiential Learning at Edinboro, who nominated Guerrero-Vasquez for the award.
CSHP Students in the Boro News

CSHP students, Sarah Schaffer (BS Social Work) and Louis Murphy (BA Geography/Environmental Studies) were voted by the Edinboro University campus community as the 2019 Homecoming Queen and King. Congratulations!

The Council on Social Work Education (CSWE) presents the prestigious Minority Fellowship Program award each year.

Last year, a total of seven colleges/universities in the U.S. had no more than one student selected for this honor. Having three Edinboro MSW students selected in 2019 is extraordinary. Congratulations to Laronda Baker, Monique Aviles, and Finn Phoenix! See more, [here](#) and on the Social Work page.

Social Work graduate student, Kyle Henry, received the 2019 Susan P. Esper National Recovery Award from the Mental Health Association of NWPA. He has ambitious plans to serve others who can benefit from his own personal experiences, resiliency, and professional training. He is pictured (L-R) with: Prof. Jessica Hippely, Erie Mayor Joe Schember, Kyle Henry, and Prof. Natalie Montero at the awards ceremony. Congratulations!
Edinboro University campus gardens have expanded. The garden feeds directly into the dining menu for farm-to-table dishes. The 60-by-40 foot plot is located behind Van Houten Dining Hall. Edinboro students Shayma Musa (physician assistant student) and Leah Pilewski (pre-veterinary medicine student) worked this past summer to plant, weed and water the garden, and collect vegetables for the dining hall. See the rest of the story [here](#).

### Meet the CSHP Secretary

**Anna Mayle**  
Office of the Dean, Wiley 112

#### 3.5 Generations of Fighting Scots

When I was admitted to Edinboro University in 2008 a word appeared near my name that both excited and confused me – “legacy”. My journey at Edinboro hadn’t truly begun and already I was a legacy? My head swelled. My mother swiftly brought me down to earth by explaining the legacy referred to me being the third generation of my family to either be employed by or attend Edinboro University.

The legacy began with my great-aunt, Mary Francis Newhall (known as Frannie) who was a professor in the art department at Edinboro University. My mother, Amy Beck, grew up in Florida, but would visit her aunt and eventually transferred to Edinboro University to complete her undergraduate degree in geography, making her next in the legacy line-up. I’m the third generation of women in my family to be a part of Edinboro University and majored in Elementary Education, earning my undergraduate degree and teaching certificate in 2012.

In 2018, ready for a change, I applied for a position at Edinboro University in the College of Science and Health Professions Dean’s Office. To my delight, I was hired and rejoined the University which was so much a part of the fabric of not only my life, but three generations of my family. Returning to Edinboro University as a staff member has been a wonderful experience and I am so grateful to be part of the campus community once more.

I didn’t return to Edinboro University alone though (and this is where the .5 from the title comes in). My first day as a staff member at Edinboro was my daughter Isabelle’s first day of preschool at the new Boro Little Learners preschool program run by the University’s Early Education Department and located in Butterfield Hall. My wee Fighting Scot is getting a jumpstart on her Edinboro University legacy and I couldn’t be happier to have her already a part of Edinboro’s campus community.
Meet Our New CSHP Faculty

Andrea Chelton is a proud 2003 graduate of Edinboro University’s BSN Nursing program. She has worked for the last 16 years as a Registered Nurse at Saint Vincent Hospital in Erie, PA, caring for patients within the Heart Center and Surgical Services. She earned her Master’s Degree in Nursing Education from Grand Canyon University in 2015 and began working at Edinboro University as a Full-Time Temporary Nursing Instructor in the fall of 2015. Mrs. Chelton currently teaches full time in the Nursing Department, focusing on sophomore level nursing courses and various department committees in which she is an active participant. She is also working on her Doctorate of Nursing Practice, on-track to complete in Spring 2020. Outside of professional interests, Mrs. Chelton enjoys spending time with her family, volunteering with her church and children’s sports teams, running, reading, and baking.

Craig Coleman is an Assistant Professor and Chairperson of the Communication Sciences and Disorders Department at Edinboro University. Craig is a Board-Certified Specialist in Fluency Disorders and a Fellow of the American Speech-Language-Hearing Association. Prior to joining the faculty at Edinboro, Craig was an Associate Professor at Marshall University in Huntington, WV for seven years and a Clinical Coordinator at Children’s Hospital of Pittsburgh for twelve years. Craig is a former two-term President of the Pennsylvania Speech-Language-Hearing Association and past Coordinator of Special Interest Group 4 of the American Speech-Language-Hearing Association (ASHA): Fluency and Fluency Disorders. Craig previously served on committees to revise the Scope of Practice in Speech-Language Pathology and develop the Childhood Stuttering Practice Portal for ASHA. He is currently Vice-President Elect of Planning for ASHA and will begin his term in January, 2020. Craig is a co-author of the Overall Assessment of the Speaker’s Experience of Stuttering (OASES) assessment tool for children who stutter. He has given over 200 presentations on stuttering and published several journal articles and book chapters on stuttering. Craig received his Master’s degree from the University of Pittsburgh. Craig enjoys coaching youth sports, where his two sons are very active.

Dr. Stephanie Diez joined Edinboro University in 2019 as an Assistant Professor in the department of social work teaching graduate social work students. Dr. Diez earned her Ph.D. from Florida International University where she was awarded a student scholar in Health Disparities Research Fellowship offered through the Center for Research on US Latino HIV/AIDS and Drug Abuse (CRUSADA). As a C-SALUD Student Scholar in Health Disparities Research Fellow, Dr. Diez’s research contributed to the reduction, prevention, and elimination of health disparities affecting Latinx populations in the United States. As a Licensed Clinical Social Worker (LCSW) and a Master Certified Addiction Professional (MCAP), Dr. Diez has worked within nonprofit community organizations and community hospitals in Miami and throughout South Florida. She provided direct therapeutic services, education, prevention, research and consultation to address behavioral health issues, such as substance use disorders, with populations of children, adolescents, adults, families, and communities. Her experiences in research and fieldwork inspired and motivated her to intervene and address the social, emotional, physical, and psychological effects of problematic technology use on individuals, families, and communities. Subsequently, in 2013, Stephanie founded Reboot & Recover, a 501(c)3 not-for-profit organization devoted to the education, prevention, research, and treatment of problematic technology use. Dr. Diez is the recipient of the Most Next Award for Innovation in 2019, a grant awarded by the AICP Foundation in recognition of her work with Reboot & Recover. Dr. Diez’s research interests include: Health disparities among Latinx; Substance use/abuse and behavioral addictions; Internet gaming disorder; Problematic internet use; technology use; Co-Occurring Disorders/ Co-morbidities; Trauma Informed Care; HIV/AIDS Disease control and prevention.
Dr. Sajedul Talukder joined the Edinboro University faculty in 2019. He earned his Ph.D. in Computer Science from the Cyber Security and Privacy Research (CaSPR) Lab at Florida International University. Dr. Talukder’s research interests include security and privacy with applications in online and geosocial networks, machine learning, wireless networks, distributed systems and mobile applications. His current research focuses on building an automated system that aims to reduce the online social networking risks for the general users and seeks to detect and defend abuses that can arise from social networking friends. Dr. Talukder’s research works have been published on top-tier social networking conferences and have been invited by Facebook in their headquarter. He was awarded several travel grants to present his research and received a number of media coverage including from NBC 6 and Sage Research Methods. He has also served as a program committee member and reviewer in several prestigious conferences and journals. At FIU, Dr. Talukder worked as a research mentor for several undergraduate students in their summer research programs (such as Science without Borders, NSF-RET, NSF-REU). During his undergraduate, he worked as a research intern in Ministry of Foreign Affairs Bangladesh and Samsung R&D Institute. Professor Talukder directs the Privacy Enhanced Security Lab (PENSLab), where he develops privacy enhanced secure systems.

Mrs. Elizabeth Gillette Farbotnik is an Assistant Professor in the nursing department. She came to Edinboro University in 2015. She received a diploma in professional nursing (RN) from St. Vincent School of Nursing in 1996. She completed her Bachelor of Science in Nursing (BSN) in 2014 from Edinboro University and continued on for her Master of Science (MSN) degree in Family Practice. She is a board certified Family Nurse Practitioner and is pursuing her Doctorate of Nursing Practice (DNP). In addition to her teaching responsibilities Mrs. Farbotnik maintains and active clinical practice at Express Care in Meadville, Pennsylvania. She resides in Waterford with her husband and four teenagers. She is an active member of the Ski Patrol at Mount Pleasant of Edinboro, a Care-team Mom for Emma’s Footprints and enjoys spending time outdoors with family and friends.

Dr. Sajedul Talukder
Math and Computer Science

Dr. Mary Weidner
Communication Sciences and Disorders

Mary Weidner is an Assistant Professor and Undergraduate Program Coordinator in the Communication Sciences and Disorders Department at Edinboro University. Mary earned her Ph.D. at West Virginia University, where she studied stuttering and counseling. Her research focuses on measuring and improving young children’s attitudes toward children with communication disorders. She authored the Attitude Change and Tolerance Program (InterACT) to teach children about human differences. Mary has presented her work at numerous state, national, and international conferences and has ongoing international research collaborations in Turkey, Poland, and Bosnia-Herzegovina. She has served as a faculty supervisor for international experiences to Jamaica and Iceland. In addition, she is the handler of a therapy dog, with whom she works in various service capacities. Before coming to Edinboro, Mary was a faculty member at Marshall University in Huntington, WV, and also worked clinically at Children’s Hospital of Pittsburgh.
2019-2020 Faculty Promotions

Dr. Nathan Adelgren, Assoc. Prof.
Dept. of Math & Computer Science

Dr. Wayne Hawley, Assoc. Prof.
Dept. of Psychology

Dr. Abdur Rahman, Assoc. Prof.
Dept. of Physics & Technology

Dr. Jill Rodgers, Assoc. Prof.

Edinboro University Bioethics Institute

The Edinboro University Bioethics Institute traveled to Pittsburgh for the national bioethics conference. President Huang also visited the Institute recently. What a great resource we have for our students pursuing careers in the health professions!

Dr. Kia Aramesh, Director of the Bioethics Institute

James Drane Lecture Series

We were treated to presentations by three international Bioethics Visiting Scholars as part of the second annual James Drane Lecture Series. Click here, for more information.

(L-R) Cornelius Ewuoso, PhD (Nigeria), Dina Senior, PhD student at Duquesne (Palestine), Olinda Timms, MD (India), Rosalyn Tolon, Pre-Dental major at Edinboro, and Kia Aramesh, MD, PhD, Director of Edinboro’s Bioethics Institute and Assistant Professor of Biology & Health Sciences

(L-R) Rosalyn Tolon, Pre-Dental major at Edinboro, James Drane, PhD, Professor and Bioethics Institute Director Emeritus at Edinboro

STEM News

Edinboro University was awarded a $1.2 million grant to prepare future STEM teachers. The National Science Foundation (NSF) Robert Noyce Teaching Scholarship Program grant helps to address the nationwide shortage of secondary STEM (science, technology, engineering, mathematics) educators. See more on this story, here.
Fermentation Industry Tour at Erie Brewing

A group of Edinboro Chemistry students and faculty toured the facilities of Erie Brewing to learn more about the equipment and processes of a large scale brewery. The Department of Chemistry recently began a program in fermentation science. For more information, see this [link].

Bunsen Society Presentations

At this year’s Bunsen Society dinner, three current Chemistry students gave presentations about their summer internships and a Chemistry-Forensic Science alum presented on her work in the crime lab where she is employed. Rebecca Manns completed a research internship at Mississippi State University. This Research Experience for Undergraduates (REU) is funded by the National Science Foundation. Angela Mosebarger completed a research internship at Stanford University funded by their Summer Research Program. The final summer intern was Isabella Keeler, who participated in research and development at Unilever in Trumbull, Connecticut. Alum Jenna Cowder shared examples of how her forensic analyses is used to try to solve criminal cases.

Edinboro University’s Governor George Leader Speech and Hearing Center Receives Parkinson’s Disease Grant

Edinboro’s graduate students in speech-language pathology will gain valuable experience with patients who have Parkinson’s disease as a result of a grant-funded community-outreach project. Edinboro University’s Governor George Leader Speech and Hearing Center was one of 149 national recipients of the Parkinson Voice Project grant. The full story is available online.

For information about Edinboro University’s Communication Sciences and Disorders programs, visit www.edinboro.edu/csd. For information about the Parkinson Voice Project grant – and a complete list of recipients, visit www.ParkinsonVoiceProject.org.

Grad Students Attend SLP Event

Graduate students attended the Medical SLP Collective Live Event in Buffalo, New York in early September. They did much of the heavy lifting involved, from taking notes during sessions to handling the sign-in tables. However, they also attended small group discussions on topics ranging from the Neonatal Intensive Care Unit and Skilled Nursing Facility settings to cognition and dysphagia management.

Students Discuss Speech Changes in Parkinson’s with Parkinson Partners of NWPA

Edinboro MASLP graduate students, Erin Hershman and Tayler Burke, joined Parkinson Partners of Northwest Pennsylvania Director Lynne Narby Gotham at a support group meeting in Erie (on September 22nd). They answered questions about the speech changes in Parkinson’s disease and shared information about the SPEAK OUT! (R), LOUD Crowd!, and related therapy programs offered - at no charge to clients - at the Governor George Leader Speech and Hearing Center at Edinboro University.
Communication Sciences & Disorders Department (continued)

Stories Over Silence

The CSD students organized the culminating event of the university-wide mental health awareness day, Stories Over Silence. They led a walk around the track and placed glow sticks on over 600 backpacks which represented the number of college students lost to suicide in the United States every year. Our students showed commitment to holistic well-being and raising awareness for this important issue.

Walk to End Alzheimer’s

On September 21st, many of the undergraduate and graduate students in the Communication Sciences and Disorders department took place in the Walk to End Alzheimer’s in Erie. Our CSD students raised over $1,500 for this great cause!

CSD Represents at the College Bowl!

On November 14th, representatives of the CSD undergraduate and graduate department participated in the College Bowl. We were the champions of the graduate division!
Communication Sciences & Disorders Awards

On October 16th, our department held the Communication Sciences and Disorders Awards Ceremony and Clinic Open House for alumni, faculty, friends, and students. The students were able to showcase many of the evidence-based practices and skills that they possess and implement. There were five graduate students awarded scholarships this year!

Stuttering Awareness Day

International Stuttering Awareness Day occurred on October 22nd. The first-year graduate students worked together to advocate for better insurance coverage for people who stutter and to raise awareness in our community!
Inspiration for Astronaut Photography Presentation

In honor of Earth Science Week, Dr. Joseph Reese presented on “Astronaut Photography: Expanding Our Understanding of Interlinked Earth Systems, Environmental Changes, Human Impacts and Ourselves.” Dr. Reese said, “The motivation to create this presentation stemmed from the coincidence of four events: A Geological Society of America (GSA) technical session on using photography in geoscience education; Earth Science Week, with the theme in 2018 of “Earth as Inspiration”; my discovery of the Overview Effect, the psychological transformation astronauts go through when they first view Earth from space; and the 50th anniversary of Apollo 11 landing on the moon, which coincidentally was my 5th birthday. I wanted to design a presentation that focused on the legacy of astronaut photography with respect to how it changes the way we think about Earth and in terms of observing interlinked Earth systems, documenting short-term environmental change and monitoring human impacts on the surface. With that, it seemed like a talk in which others would be interested, so I offered and was invited to present it in a variety of settings.”

Where presented:
EU for 2018 Earth Science Week (10/18), GSA national meeting, Indianapolis, IN (shortened version; 11/18), Allegheny College (01/19), Mercyhurst University (02/19), Slippery Rock U (04/19), Asbury Woods Nature Center, Erie, PA (07/19), Jefferson Educational Society (JES), Erie, PA (07/19), General McLane High School (09/19), NW PA Collegiate Academy (09/19), McDowell Intermediate High School (10/19), and – full circle! – EU for 2019 Earth Science Week (10/19)

According to Dr. Reese, the topic will be presented again at GSA NE / SE combined sectional meeting, Reston, VA (03/20), JES Corry satellite (05/20), and “who knows where else!”

College Bowl Winners!

Congratulations to the Geosciences team that won the undergraduate division of the College Bowl on November 14th!

Research
Computer Science Students Research

Congratulations to computer science students Rebecca Aloisio and Riley Vaughn for being awarded summer research internships at the U.S. Department of Energy’s laboratories during their junior year. Rebecca studied at Argonne in Chicago and Riley studied at Brookhaven on Long Island. The participated in research projects supporting the Department of Energy’s mission, and received funding for housing, transportation, and a weekly stipend.

Michael Bellissimo—Math Instructor at Johns Hopkins University’s Center for Talented Youth

“I would not be where I am today without the opportunities, support and guidance from Edinboro University’s astounding faculty.”

Michael Bellissimo speaks highly of his studies at Edinboro and how EU has aided in his success. See his story here.

2019 Fall Semester Adventures

Dr. Downey spoke at research seminar on “A fundamental Property of Bilinear Operators.”

Programming teams after preparing to compete for a contest.
The Women's Networking Group went to the Buffalo Farm Corn Maze in October. The group is also planning an upcoming Pot Luck and Game Night!

The group provides the opportunity for women majoring in STEM fields to interact and connect with each other. They discuss job searching and career options for STEM majors and also some of the challenges faced by women, including “imposter syndrome.”

For more information, please email Professor Amanda Porter at APORTER@edinboro.edu and check out their Instagram here.

Halloween fun with MACS!

First year MACS students. Welcome!
Edinboro University’s Nursing Program is a Model for Developing Programs in Africa

Dr. Victoria Hedderick worked with representatives from the Africa Center for Health Leadership on October 1st. Dr. Hedderick said, “They wanted to learn about our program design with respect to facilities and curriculum. Their organization is trying to increase the number of nurses in Nigeria as well as increase the level of respect consistent with the level in the States.” This venture could provide more opportunities for Edinboro University nursing students, in the near future. Dr. Hedderick stated, “We will be working together in the future on an opportunity to provide a student exchange so both schools/students can learn about health care in the respective countries.”

2017 Edinboro University Nursing Graduate Created UPMC Hamot’s Memory Program

Brandi Duvuvei is a nurse at UPMC Hamot in the Cardiovascular Neuro Intensive Care Unit. She created a memory program for family members who have a loved one who is critically ill. Beth Farbotnik, FNP-BC & Assistant Professor in the Nursing Department, stated “She makes handprints for families to have as keepsakes when their loved one has passed away. She is an amazing young woman!”

Here is how Brandi describes her Memory Program. “Deciding to become a nurse was the best decision I have ever made. Every day I am given the opportunity to touch a life, learn and grow. Being a caregiver in the cardiovascular intensive care unit has been rewarding. I am challenged, and see some of the communities sickest patients. Working with this population can be bitter-sweet, because though I have seen some true miracles, I am often the glue that helps to hold together a family who is losing someone near and dear to them. In an effort to do more for these patients and their families during such a difficult time, I created a “memory box”. This box has different colored paper, paints, and brushes so that families and friends can be invited to “make a memory” and make a handprint to keep of their loved one who has transitioned to comfort care or passed away. During this time we reflect on memories, laugh and cry, and even listen to music the patient liked! Loss is hard, but I believe that life should always be celebrated, and this is a way for families to celebrate life and to make touching memory. It is an honor to support a patient and their family/friends during this time, and it warms my heart to create handprints with them. When you are a nurse you know that every day you will touch a life or a life will touch yours.”
Our RNs are in high demand.

At Edinboro University, 100% of our Nursing graduates secure full-time positions across the country. Here's where a nationally recognized Boro Nursing degree is taking our 2019 graduates:

- Taylor Shade, Alaska Regional Hospital
- Taylor Bender, UPMC Hamot on the medical oncology floor
- Amber Bokshan, Active duty in the U.S. Army Nurse Corps
- Hannah Cantrill, Cleveland Clinic Marymount Hospital in the Intensive Care Unit
- Tessa Chaney, St. Vincent Hospital in the Cardio/Neuro Intensive Care Unit
- Summer Cross, Mayo Clinic in the Vascular/Surgical Progressive Care Unit
- Kaine Fidell, Allegheny General Hospital in the Complex Medical Care Unit
- Kristen Austin, Children's Home of Pittsburgh
- Adam Koehler, Cleveland Clinic Euclid, OH on a medical/surgical stroke floor
- Meghan Lucci, Children's Hospital in Pittsburgh in the Neuro/Ortho Trauma Unit
- Morgan Lutz, Heritage Valley Beaver on an observation/telemetry floor
- Megan Sheehan, Rochester General Hospital in the Medical Observation Unit
- Sydney Roach, UPMC Presbyterian in an Acute Liver Failure Unit
- Amber Petras, Cleveland Clinic in Weston, FL
- Amanda Metz, Critical-care/ER nurse at Mercy Hospital in Buffalo, NY
- Nathan McKinney, UPMC Mercy in the Neuro-Trauma Unit
- Alexia Zelaski, Mayo Clinic in the Cardiac Surgery Step Down Unit
- Taylor Zagorski, UPMC Montefiore in Pittsburgh in a General Medicine Unit
- Hannah Stennett, West Penn Hospital in Pittsburgh in the Labor and Delivery Unit
- Megan Sceptock, Cleveland Clinic Main Campus in the Respiratory ICU/Step Down Unit

Admission Criteria

BSN
- ≥1000 SAT or ≥22 ACT
- Top 40% of high school graduating class
- Successful completion of all high-school chemistry, biology, geometry, algebra I & II

Accelerated BSN
- Bachelor’s degree from a regionally accredited institution
- College GPA ≥ 3.0
- Grade of a C in human A & P, statistics, chemistry with lab
- Successful interview

Nursing Council on Accrediting (CCNE)

FOR THOSE WHO STRIVE.
2017 Physics and Math Alumnus Presentation

2017 physics and math alumnus, Kevin Shuman, visited Edinboro in April to give a presentation on his Ph.D. research at Montana State on the use of LISA to better understand gravitational waves in space.

Check out the brief YouTube video on the Physics & Technology Department at Edinboro University and share!  
EU Physics & Technology

First Energy/Penelec Partnership

Edinboro University is fortunate to be able to offer a program in electric utility technology through a terrific partnership with First Energy/Penelec.

Congratulations to the Porreco College of Edinboro University students who completed the Power Systems Institute program in conjunction with FirstEnergy, with an associate degree in Applied Technology in May 2019: Nickolas Beaulieu, Adam Bennett, Jordan Bradybaugh, Nicholas Carowick, Zachary Czap, Ian Davis, Anthony Denofrio, Mitchell Dorunda, Tyler Emrick, Jared Kula, Jared Makoczy, Jordan Malizia, Brandon Morton, Dakota Miller, Justin Nale, Casey Pace, Michael Passinger, Joshua Pollock, Andrew Rosenberger, Broc Schoepner, Addison Shull, Zachary Smith, Matthew Speranza, Taylor Stamm, Evan Tanner, Hunter Thompson and Nathan Unch.

This two-year program offers admission to about 25 students each fall and the tuition and fees are paid by First Energy; graduates are virtually guaranteed a position with First Energy, with starting pay of about $30/hr.
Medical Marijuana and Research Issues

Dr. Peter McLaughlin of our Department of Psychology was interviewed by the Meadville Tribune about research on medical marijuana and how the illegality of marijuana hinders research. See the complete story in the Meadville Tribune, here.

Publication in Behavioural Pharmacology

Congratulations to Dr. Wayne Hawley and former Edinboro Psychology student Deandra Mosura for their publication in Behavioural Pharmacology. Deandra was a research assistant at Penn State-Hershey when this research was published, but it was conducted while she attended Edinboro University.

Kimberly Mosher—Master of Science—Organization Leadership, Purdue University Fort Wayne

Kimberly Mosher feels that Edinboro University’s Psychology department has successfully prepared her for graduate studies. See her full story here!

Research

Edinboro’s Master of Social Work Ranked Highly
Our online Master of Social Work (MSW) program is ranked #8 in the US and #1 in Pennsylvania for mid-career alumni salaries at $70.3K/yr. Our MSW has start dates of May (advanced standing), August, and January, and is also available in a face-to-face format. We have 30+ instructors in the MSW program and students from throughout the US. For more information, click here.

Social Work Professor Awarded
Congratulations to Dr. Molly Wolf (center), Associate Professor in our Department of Social Work, for being selected for the 2019 Distinguished Ph.D. Alumni Award from SUNY Buffalo. The award is based on contributions to scholarship and impact to the community.

2019 Council on Social Work Education Minority Fellows from Edinboro University’s Master of Social Work (MSW) Program

Laronda Barker
Hometown: Montgomery, PA
Previous Education: BA in Social Studies Education (Millersville); MEd in Multicultural Education (Eastern)
Previous positions: Care manager, resource specialist
Professional goals: become a licensed clinical social worker (LCSW) and serve children and adolescents in Philadelphia, PA with depression, anxiety, addictions, and/or eating disorders

Finn Phoenix
Hometown: Madison, WI
Previous Education: BS in Applied Science (Wisconsin)
Previous positions: Teacher, community organizer
Professional goals: to work with queer, Latinx and BIPOC youth and families to build personal and collective power

Monique Aviles
Hometown: North Brunswick, NJ
Previous Education: BS in Accounting (Alcorn State); MS in Accounting (Texas A&M)
Previous positions: Senior loan processor, residential counselor
Professional goals: become a licensed clinical social worker (LCSW) in private practice and provide psychotherapy and sexual health psychoeducation to racial/ethnic minority populations

New Faculty Member Writes for Harvard Medical School
One of our new faculty members this year, Dr. Stephanie Diez, of the Department of Social Work, was invited to write an editorial on addiction and social media for Harvard Medical School. Read more, here.

Research
http://dx.doi.org/10.1080/01488376.2013.845131
We enjoyed hearing from the dynamic duo of Erin O’Brien (‘18 Chemistry: Forensic Science) and Joel Lohr (‘18 Biochemistry) who are now very busy at WVU—Erinn in her second year of law school and Joel in his first year of medical school. They offered some advice for students planning similar paths.

Law School
1. Your undergraduate areas of study will not limit your ability to attend law school or become a great lawyer. Having an undergraduate background in your specialty area of law is an asset.
2. Obtain exposure to operations of a governmental agency or law firm.
3. Develop your leadership skills in academic and social organizations.
4. Participate in LSAT prep throughout your junior year and take the exam in the summer before your senior year. Apply to law schools before Christmas break and visit in the spring.

Medical School
1. Shadow physicians in the summer after freshman year and engage in university/community service.
2. Participate in research no later than fall of sophomore year and then take summer research opportunities (e.g., REU) in the following two summers (apply during the previous Fall semester).
3. MCAT prep every week of junior year (1 hr/wk the first week, then add 1 hour each subsequent week).
4. Submit the primary application to AMCAS in early summer.
5. Take the MCAT in July and your score will be received in time to submit secondary applications in early Fall (the earlier you apply, the better your chances of getting an interview and admission).

Three former Edinboro Biology classmates from ’78, Drs. Vytas Bankaitis, David Montefiori, and William Jacobs, have each received national and international recognition for their groundbreaking work in AIDS, tuberculosis, and lipids. Our students are following in the footsteps of greatness and the recipe remains the same—curiosity, hard work, and determination! Click on their names for more information on their efforts.
How long have you taught at Edinboro University, and what are some of the things that you enjoy most about teaching here?

I’ve been at Edinboro University for 22 years. I particularly enjoy watching the students’ progress through the nursing program and also witnessing the many wonderful contributions they make to the nursing profession once they have completed the program.

What are some of the goals that you have for your students and/or department (long-term and/or short-term)?

Student Goals: Preparing each student to be successful on the NCLEX licensure exam on the first attempt and giving them the confidence they need to be successful entry level practitioners. Department Goals: Maintain the NCLEX licensure exam pass rate that far exceeds national levels. I also hope that the department can offer new programs that meet the health care needs of the patients in this region.

Why did you decide to go into the nursing profession? Did you ever consider another field of study or career?

I knew that nursing was for me at a very early age. I started volunteering in a hospital at the age of 18. I was then hired on as an orderly at age 19. This allowed me to see first-hand the role of the professional nurse and its impact on patients in the community. It’s a decision that I have NEVER regretted and would repeat my career path without hesitation.

What publications/projects/research/areas of nursing are you currently involved with, and would you like to expand in these areas?

I have recent publications in the Advanced Emergency Nursing Journal. Subjects include TMJ dislocation, Zygomatic arch fractures, and fractures of the scapula.

What are some of the goals that you have for yourself as a professor, nurse, and person?

Goals include obtaining board certification as an ER nurse practitioner.

Do you think that it is important to have other interests outside of your career focus? If so, how do you meet this need in your own life?

I firmly believe in a balance with career and life outside of nursing. Personally, I like to travel and take advantage of every opportunity I get. I’m usually on a plane heading somewhere every couple of months even if it’s for a long weekend.

What are some positive, words of wisdom or encouragement that you could offer to your students, faculty, and/or the campus as a whole?

I tell my students that if they can achieve the level of satisfaction from their nursing career that I have attained, then life for them will be very good. I’m fortunate to have found a career that has proven to be personally and professionally fulfilling.

Edinboro Teammates with Honors

Rebecca Manns (BS Physics and Biochemistry) and Sidney Dobbins (BS Biology) are teammates on the soccer team. Both CSHP students are also in the Honors program. Last summer, Rebecca completed an NSF-funded research internship at Mississippi State University and Sidney completed a research internship at SUNY-Upstate Medical University.

For more information on the College of Science and Health Professions, following us on our social media sites!

Want to be featured in the Newsletter?

Are you a CSHP alumna, current student, or faculty member?

Do you know someone who should be featured in this newsletter?

Examples of content include, but are not limited to:

1) New faculty brief bios or interviews
2) Student awards, honors, or scholarships
3) Faculty grants, publications, and/or presentations
4) Upcoming site visits by accrediting bodies (and reports after they leave)
5) Study or service abroad
6) Group and/or individual performance on licensing exams or graduate admissions
7) Lab or clinical facilities and equipment and how they are utilized
8) Upcoming alumni or other guest visits/presentations
9) New programs or curriculum updates
10) Profile of students and alumni
11) Student research or internship talks.

Contact cshp@edinboro.edu for more information!
